Author index

Volume 38 (1996)

Agelink, R. **38**, 249
Ardi, P. **38**, 179
Århem, P. **38**, 191

Barham, J. **38**, 235

Carvalho-Rodrigues, F. **38**, 229
Conrad, M. **38**, 97
Conrad, D. **38**, 207

de Oliveira, P.P.B. **38**, 51
De Vree, J.K. **38**, 221
Dockery, J. **38**, 229
Dockery, J. **38**, 253

Erdi, P. **38**, 179

Fleissner, P. **38**, 243

Garrido-del Solo, C. **38**, 75
Gunji, Y.-P. **38**, 127
Gunji, Y. **38**, 127

Hashimoto, T **38**, 1
Havsteen, B.H. **38**, 75
Hofkirchner, W. **38**, 243

Ikegami, T. **38**, 1

Kampis, G. **38**, 119
Kell, D.B. **38**, 15
Kim, J.-H. **38**, 29

Lagunez-Otero, J. **38**, 45
Liberman, E.A. **38**, 173

Margalef, R. **38**, 141
Marij, P.C. **38**, 87
Marijuan, P.C. **38**, 87
Marijuán, P.C. **38**, 163
Matsuno, K. **38**, 111
Mendes, P. **38**, 15
Mendoza, L. **38**, 45
Migita, M. **38**, 127
Minina, S.V. **38**, 173
Myung, H **38**, 29

Oliveria, P. **38**, 51

Paton, R. **38**, 155
Popov, O. **38**, 65

Rossi, E.L. **38**, 199
Rossler, O.E. **38**, 211

Segal, D.M. **38**, 65
Solo, C.G. **38**, 75
Stonier, T. **38**, 135
Stonier, T. **38**, 135

Toyoda, S.-I. **38**, 127
Trifonov, E.N. **38**, 65

van der Heijden, N. **38**, 249
Varón, R. **38**, 75
Vree, J. K. **38**, 221

Welch, G. R. **38**, 147

BioSystems 38 (1996) 261–264

Bio Systems

Subject index

Volume 38 (1996)

Adaptability; Information; Order; Stability; Non-linearity; Social systems **38**, 221

Algorithmic evolution; Net-grammar; Module-type evolution; Evolution of language; Symbolic grammar systems **38**, 1

Artificial neural networks; Metabolic control analysis; Enzyme kinetics; Parameter estimation **38**, 15

Biocomputing; Measurement; Wittgenstein; Paradox **38**, 127

Bioenergetics; Cytomatrix; Protein structure; Enzyme catalysis; Molecular energy machines **38**, 147

Biological information; Enzyme function; Protein degradation; Functional voids; Symmetry; Informational problem-solving **38**, 163

Biological organization; Cross-scale interactions; Quantum mechanics; Gravity; Fluctuon model; Recursive evolution **38**, 97

Brain theory; Complexity; Neurodynamics **38**, 179

Cellular automata; Evolutionary system; Turing-machine; Enact; Coupled computation **38**, 51

Cohesive interaction; Inconsistency; Information; Internal measurement; Semantics **38**, 111

Command and control; Military science; Military information systems **38**, 253

Complementarity; Man-animal difference; Superobserver-observer difference; Exteriority; Ethics **38**, 211

Complex systems; Information; Gene; Self-organizing; Psychology **38**, 199

Complexity; Brain theory; Neurodynamics **38**, 179

Complexity; Information; Limits of computation; Emergence; Process philosophy; Distributed code systems **38**, 119

Computational efficiency; Hybrid evolutionary programming; Deterministic optimization; Solution accuracy **38**, 29

Consciousness; Mind; Semantics; Information **38**, 207

Consciousness; Psycho-physical interactionism; Spontaneous Brain activity; Ion channels **38**, 191

Coupled computation; Evolutionary system; Turing-machine; Enact; Cellular automata **38**, 51

Cross-scale interactions; Quantum mechanics; Gravity; Fluctuon model; Recursive evolution; Biological organization **38**, 97

Cytomatrix; Protein structure; Enzyme catalysis; Bioenergetics; Molecular energy machines **38**, 147

Deterministic optimization; Hybrid evolutionary programming; Computational efficiency; Solution accuracy **38**, 29

Dissipative system; Ecology; Indeterminacy; Information; Self-organization **38**, 141

Distributed code systems; Information; complexity; Limits of computation; Emergence; Process philosophy **38**, 119

Dynamics; Information exchange; Workshop; Interactors **38**, 229

Ecology; Dissipative system; Indeterminacy; Information; Self-organization **38**, 141

Emergence; Information; complexity; Limits of computation; Process philosophy; Distributed code systems **38**, 119

Emergentist philosophy; Evolutionary systems; Theory of information; Semiosis **38**, 243

0303-2647/96/$15.00 © 1996 Elsevier Science Ireland Ltd. All rights reserved

Enact; Evolutionary system; Turing-machine; Coupled computation; Cellular automata **38**, 51

Entropy; Information theory; Thermodynamics; Potential energy; Infons **38**, 135

Enzyme catalysis; Cytomatrix; Protein structure; Bioenergetics; Molecular energy machines **38**, 147

Enzyme function; Protein degradation; Functional voids; Biological information; Symmetry; Informational problem-solving **38**, 163

Enzyme kinetics; Artificial neural networks; Metabolic control analysis; Parameter estimation **38**, 15

Enzyme kinetics; Rapid equilibrium; Unstable product; Unstable substrate; Unstable systems **38**, 75

Ethics; Man-animal difference; Superobserver-observer difference; Exteriority; Complementarity **38**, 211

Evolution of language; Net-grammar; Algorithmic evolution; Module-type evolution; Symbolic grammar systems **38**, 1

Evolutionary system; Turing-machine; Enact; Coupled computation; Cellular automata **38**, 51

Evolutionary systems; Emergentist philosophy; Theory of information; Semiosis **38**, 243

Exon detector; Ribosome; Exonic sites **38**, 45

Exonic sites; Ribosome; Exon detector **38**, 45

Exteriority; Man-animal difference; Superobserver-observer difference; Complementarity; Ethics **38**, 211

Fluctuon model; Cross-scale interactions; Quantum mechanics; Gravity; Recursive evolution; Biological organization **38**, 97

Functional voids; Enzyme function; Protein degradation; Biological information; Symmetry; Informational problem-solving **38**, 163

Gene; Information; Complex systems; Self-organizing; Psychology **38**, 199

Glue; Verb; Text; Interpretation; Liver; Hierarchy **38**, 155

Gravity; Cross-scale interactions; Quantum mechanics; Fluctuon model; Recursive evolution; Biological organization **38**, 97

Hierarchy; Glue; Verb; Text; Interpretation; Liver **38**, 155

Human languages; Linguistic complexity; Texts; Protein sequences **38**, 65

Hybrid evolutionary programming; Deterministic optimization; Computational efficiency; Solution accuracy **38**, 29

Inconsistency; Cohesive interaction; Information; Internal measurement; Semantics **38**, 111

Indeterminacy; Dissipative system; Ecology; Information; Self-organization **38**, 141

Infons; Information theory; Thermodynamics; Entropy; Potential energy **38**, 135

Information; Cohesive interaction; Inconsistency; Internal measurement; Semantics **38**, 111

Information; complexity; Limits of computation; Emergence; Process philosophy; Distributed code systems **38**, 119

Information; Consciousness; Mind; Semantics **38**, 207

Information; Dissipative system; Ecology; Indeterminacy; Self-organization **38**, 141

Information; Gene; Complex systems; Self-organizing; Psychology **38**, 199

Information; Meaning; Teleology; Non-linear dynamics **38**, 235

Information; Order; Adaptability; Stability; Non-linearity; Social systems **38**, 221

Information; Structure; Steering; Regulation; Social theory **38**, 249

Information exchange; Workshop; Dynamics; Interactors **38**, 229

Information theory; Thermodynamics; Entropy; Potential energy; Infons **38**, 135

Informational problem-solving; Enzyme function; Protein degradation; Functional voids; Biological information; Symmetry **38**, 163

Interactors; Information exchange; Workshop; Dynamics **38**, 229

Internal measurement; Cohesive interaction; Inconsistency; Information; Semantics **38**, 111

Interpretation; Glue; Verb; Text; Liver; Hierarchy **38**, 155

Ion channels; Consciousness; Psycho-physical interactionism; Spontaneous Brain activity **38**, 191

Limits of computation; Information; complexity; Emergence; Process philosophy; Distributed code systems **38**, 119

Linguistic complexity; Texts; Protein sequences; Human languages **38**, 65

Liver; Glue; Verb; Text; Interpretation; Hierarchy **38**, 155

Living system; Molecular computer; Quantum regulator; New science **38**, 173

Man-animal difference; Superobserver-observer difference; Exteriority; Complementarity; Ethics **38**, 211

Meaning; Information; Teleology; Non-linear dynamics **38**, 235

Measurement; Biocomputing; Wittgenstein; Paradox **38**, 127

Metabolic control analysis; Artificial neural networks; Enzyme kinetics; Parameter estimation **38**, 15

Military information systems; Command and control; Military science **38**, 253

Military science; Command and control; Military information systems **38**, 253

Mind; Consciousness; Semantics; Information **38**, 207

Module-type evolution; Net-grammar; Algorithmic evolution; Evolution of language; Symbolic grammar systems **38**, 1

Molecular computer; Quantum regulator; Living system; New science **38**, 173

Molecular energy machines; Cytomatrix; Protein structure; Enzyme catalysis; Bioenergetics **38**, 147

Net-grammar; Algorithmic evolution; Module-type evolution; Evolution of language; Symbolic grammar systems **38**, 1

Neurodynamics; Brain theory; Complexity **38**, 179

New science; Molecular computer; Quantum regulator; Living system **38**, 173

Non-linear dynamics; Meaning; Information; Teleology **38**, 235

Non-linearity; Information; Order; Adaptability; Stability; Social systems **38**, 221

Order; Information; Adaptability; Stability; Non-linearity; Social systems **38**, 221

Paradox; Biocomputing; Measurement; Wittgenstein **38**, 127

Parameter estimation; Artificial neural networks; Metabolic control analysis; Enzyme kinetics **38**, 15

Potential energy; Information theory; Thermodynamics; Entropy; Infons **38**, 135

Process philosophy; Information; complexity; Limits of computation; Emergence; Distributed code systems **38**, 119

Protein degradation; Enzyme function; Functional voids; Biological information; Symmetry; Informational problem-solving **38**, 163

Protein sequences; Linguistic complexity; Texts; Human languages **38**, 65

Protein structure; Cytomatrix; Enzyme catalysis; Bioenergetics; Molecular energy machines **38**, 147

Psycho-physical interactionism; Consciousness; Spontaneous Brain activity; Ion channels **38**, 191

Psychology; Information; Gene; Complex systems; Self-organizing **38**, 199

Quantum mechanics; Cross-scale interactions; Gravity; Fluctuon model; Recursive evolution; Biological organization **38**, 97

Quantum regulator; Molecular computer; Living system; New science **38**, 173

Rapid equilibrium; Enzyme kinetics; Unstable product; Unstable substrate; Unstable systems **38**, 75

Recursive evolution; Cross-scale interactions; Quantum mechanics; Gravity; Fluctuon model; Biological organization **38**, 97

Regulation; Information; Structure; Steering; Social theory **38**, 249

Ribosome; Exon detector; Exonic sites **38**, 45

Self-organization; Dissipative system; Ecology; Indeterminacy; Information **38**, 141

Self-organizing; Information; Gene; Complex systems; Psychology **38**, 199

Semantics; Cohesive interaction; Inconsistency; Information; Internal measurement **38**, 111

Semantics; Consciousness; Mind; Information **38**, 207

Semiosis; Emergentist philosophy; Evolutionary systems; Theory of information **38**, 243

Social systems; Information; Order; Adaptability; Stability; Non-linearity **38**, 221

Social theory; Information; Structure; Steering; Regulation **38**, 249

Solution accuracy; Hybrid evolutionary programming; Deterministic optimization; Computational efficiency **38**, 29

Spontaneous Brain activity; Consciousness; Psycho-physical interactionism; Ion channels **38**, 191

Stability; Information; Order; Adaptability; Non-linearity; Social systems **38**, 221

Steering; Information; Structure; Regulation; Social theory **38**, 249

Structure; Information; Steering; Regulation; Social theory **38**, 249

Superobserver-observer difference; Man-animal difference; Exteriority; Complementarity; Ethics **38**, 211

Symbolic grammar systems; Net-grammar; Algorithmic evolution; Module-type evolution; Evolution of language **38**, 1

Symmetry; Enzyme function; Protein degradation; Functional voids; Biological information; Informational problem-solving **38**, 163

Teleology; Meaning; Information; Non-linear dynamics **38**, 235

Text; Glue; Verb; Interpretation; Liver; Hierarchy **38**, 155

Texts; Linguistic complexity; Protein sequences; Human languages **38**, 65

Theory of information; Emergentist philosophy; Evolutionary systems; Semiosis **38**, 243

Thermodynamics; Information theory; Entropy; Potential energy; Infons **38**, 135

Turing-machine; Evolutionary system; Enact; Coupled computation; Cellular automata **38**, 51

Unstable product; Enzyme kinetics; Rapid equilibrium; Unstable substrate; Unstable systems **38**, 75

Unstable substrate; Enzyme kinetics; Rapid equilibrium; Unstable product; Unstable systems **38**, 75

Unstable systems; Enzyme kinetics; Rapid equilibrium; Unstable product; Unstable substrate **38**, 75

Verb; Glue; Text; Interpretation; Liver; Hierarchy **38**, 155

Wittgenstein; Biocomputing; Measurement; Paradox **38**, 127

Workshop; Information exchange; Dynamics; Interactors **38**, 229
